

MOMENTO SILVERLINE™ COVER

SILVERLINE™ PLASTIC COVER FOR MOMENTO IMPACT SOCKETS

- Silverline™ Cover is made of a soft and durable plastic material that provides a protective barrier between your Momento Silverline™ socket and the final fine surface on the workpiece. The free-spinning design provides high protection for polished and high sensitive surfaces.
- If the plastic cover becomes worn, it can easily be replaced with a new one on the same power socket.
- Article numbers for only plastic cover as well as complete protected socket can be found in the charts below.
- Plastic covers also fits on surface drive-, torx, 12-point-, and magnetic sockets in both metric and imperial sizes.
